

FTTH Council Asia-Pacific organized Indonesia FIBERTalk 2019 in Jakarta

Jakarta, 27th June, 2019 – The FTTH Council Asia-Pacific has successfully celebrated the continuing development of fiber to the home technologies along with 5G, IoT and smart cities as it organized its regular event bringing together industry experts in Indonesia. The theme for the day was “Fiber is the enabler of 5G, IoT & Smart Cities”. Speakers and delegates from across the industry came together at the JW Marriott Jakarta to discuss some of the hottest topics in the field, including regulatory policy, deep fiber, 5G, Smart Cities etc. Around 95 industry experts from Indonesia, India, China, France, Malaysia and other parts of APAC took part at the event.

Tim Yamada, FTTH Council Asia-Pacific delivered the welcome speech highlighting the updated FTTH developments across Asia-Pacific region.

Bpk. Iskandar, Head of Sub Directorate of Telecommunications and Informatics Numbering of KEMKOMINFO delivered the opening keynote. Some of the areas he covered was Indonesian latest uptake numbers, status of fiber internet etc

Ariyanto, AVP Access Network & IT Solution of PT Telkom Indonesia delivered speech on "Success story of Telkom". He shared their insights of operation of Telkom Indonesia.

Hiroshi Nakamura, Senior Manager of Furukawa Electric Co. Ltd covered "Energy Cost Saving by Ultra Low Loss Fiber Cables" in his presentation

Puneet Garg, CTO of MyRepublic Indonesia presented on "Building a Fiber Rich Gigabit Society". He covered some interesting numbers on his company and overall of their operation in Indonesia

The next speaker was Thiam Por Ng, the Sr. Sales Manager APAC of Corning who presented on "5G & Innovative Fiber Solution"

The next speaker was Thomas Dragono, Director of FiberStar who delivered his presentation on "Changing Face of FTTH in the Era of Evolving Customer Needs". He shared their experiences and challenges they face deploying fiber in Indonesia

Michael van Moppes was the next speaker who is the General Manager of Plumettaz Singapore. He presented on "Installation Of Cable Into Duct"

Afterwards, Ling Daiman, Head of KOMINFO of Cirebon Smart City and presented on "Building a Smart Indonesia"

Raymond Lai, the Technical Director of EXFO presented on "A New Approach to Fiber Testing". He also unveiled the industry first Optical Fiber Multimeter (OFM) for the first time named Optical Xplorer™ OX1, a new breed of Optical Tester designed for installation, activation and repair operations.

The next speaker was Hasanudin Farid, the Head Technology Strategy of XL Axiata and he presented on "Towards 5G: Challenges & Opportunities in Indonesia"

The following speaker, Sudipt Khandelwal, the Head of Sales - APAC of Sterlite Technologies Ltd presented on "FTTH Trends in APAC and Networks of the Future"

The finishing session was taken by Steve Foster, the Chair of Smart Cities Committee of FTTH Council Asia-Pacific and he shared the committee activities and the "Smart Fiber Cities Concept".

This event was supported by Furukawa Electric as the Platinum sponsor and Corning, Plumett, EXFO & STL as the Gold sponsors.

Finally the FIBER cocktail was hosted by the Council to create exclusive networking opportunities for all the attendees.
